2011 Linear Collider Workshop of the Americas (ALCPG11)

Sunday 20 March 2011

Detector - Tracking - Willamette 100 (08:30 - 10:00)

-Conveners: Marcel Demarteau; Timothy Nelson; Daniel Peterson

time	[id] title	presenter
08:30	[289] New technologies for structural and enviromental monitoring of tracker and vertex systems	FERNANDEZ GARCIA, Marcos
09:00	[295] SiD tracking: performance at high energy	PARTRIDGE, Richard

Detector - Tracking - Willamette 350, Mobio Conf Room (13:30 - 15:30)

time	[id] title	presenter
13:30	[296] Progress with pixelised readout of gaseous detectors	TIMMERMANS, Jan
14:00	[297] Development of a low-material TPC endplate for ILD	Dr PETERSON, Daniel
14:30	[298] Progress on ILC Tracking R&D at SCIPP	SCHUMM, Bruce
15:00	[299] Vertex Detector and Silicon Tracker Power and Cabling Considerations	COOPER, William

Tuesday 22 March 2011

Detector - Tracking - Willamette 110 (10:30 - 12:00)

-Conveners: Marcel Demarteau; Timothy Nelson; Daniel Peterson

time	[id] title	presenter
10:30	[300] A novel two-dimensional microstrip sensor with charge division readout	FERNANDEZ GARCIA, Marcos
11:00	[302] Testing of Cables for KPiX Pulse Load	DHAWAN, Satish
