

Higgs BR study status

ILC Physics and software meeting

2014. Sep. 26

H. Ono (NDU)

Current status of Higgs BR analysis

- Compare and check consistency with Felix analysis (vvh @350 GeV)
- qqh @250 GeV
 - kt jet clustering with “exclude 6 jet R=1.5”
 - First look but not so change and improve
 - Optimizing kt clustering
- Investigate qqh channel degradation @ 250 GeV
 - Implement MVA to comparison
