

status

- finalize ISR recovery for MEM in recoil mass analysis
- preparing new release of Physsim-v00-02 (before new year), new features:
 - * adding support for new processes, ZZ , eeZ , $\nu\nu Z$, WW , evW , ttH
 - * switch to calculate ME with decay or without decay of final state H , Z , or W
 - * switch to return matrix element or differential cross section
 - * support to select feynman diagram in ME calculation
