

Data taken at the 2015 beam test

P. Colas

March 1-14, 2015

D. Bhattacharya, P. Colas, F. Couderc, R. Diener, M. Dixit,
K. Fujii, S. Ganjour, J. Kaminski, R. Mehdiyev, B. Tuchming
(Remotely: D. Attié et al.)

Arrival at DESY March 1, 2015 evening.

Several incidents delayed the start of the test: disappearance of our 30 kW LV supply, Stage often stuck, lack of CO₂ in TRACI, one module broken while mounting (S8G). Replace by S10X.

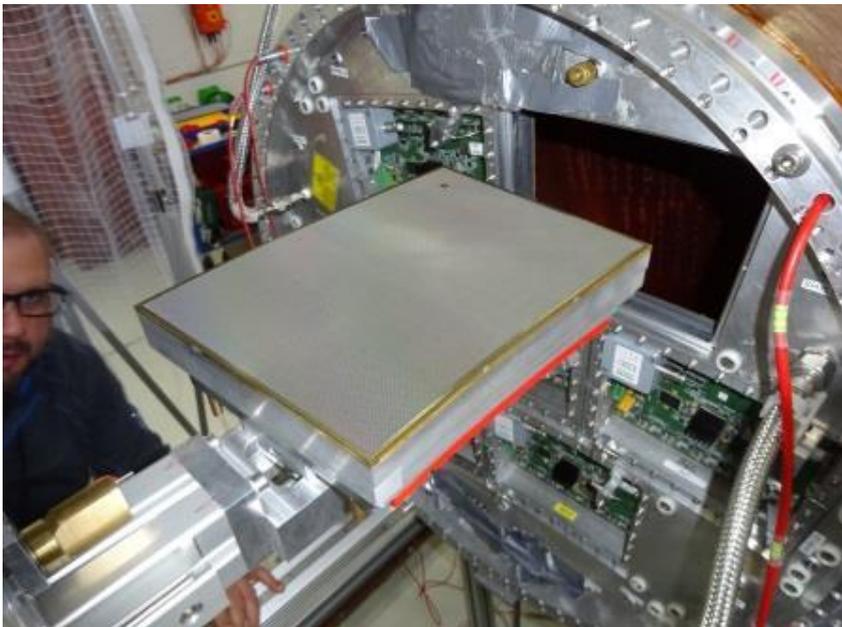

Then start gas on March 5 and 2PCO₂ cooling. Take data.

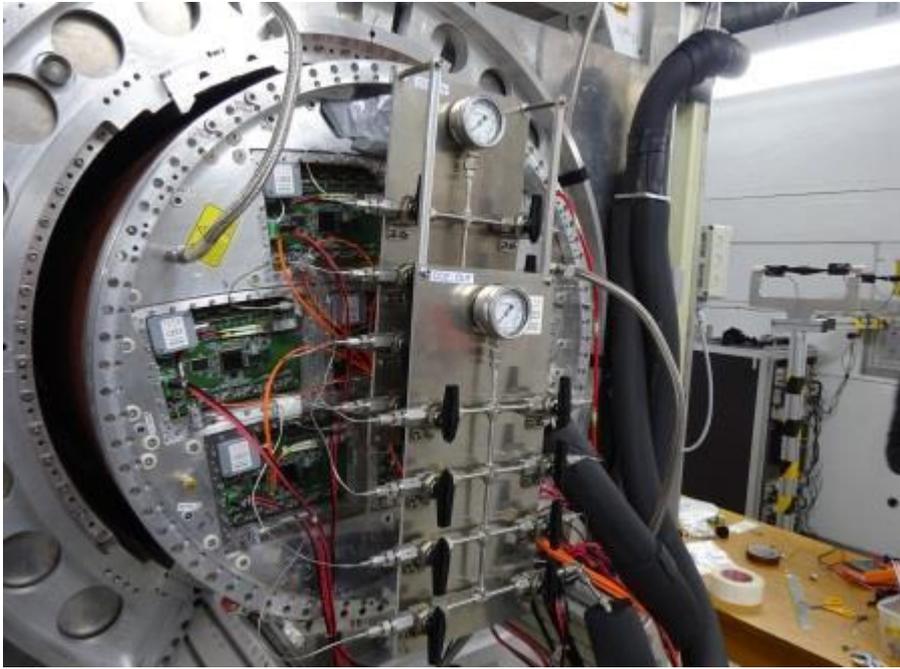

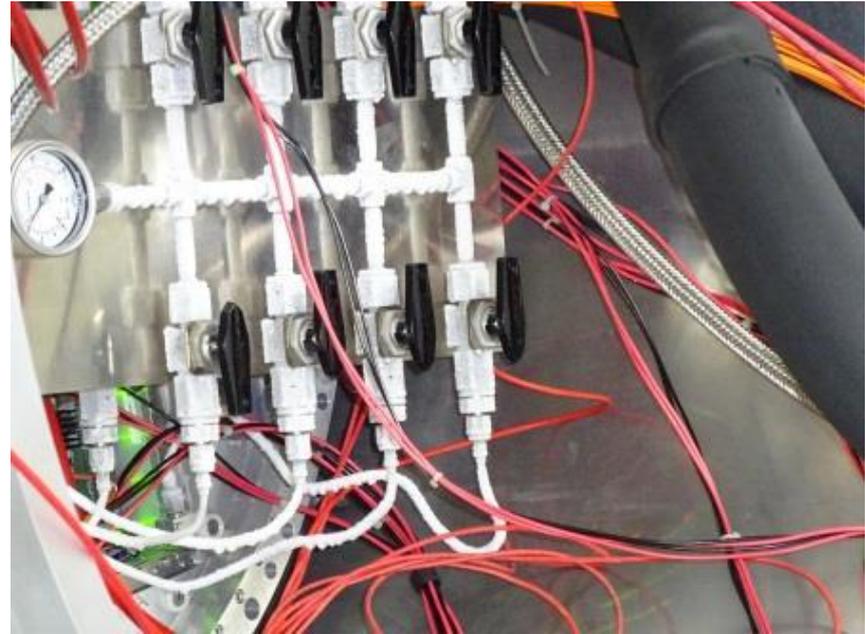

On Saturday March 7, frost was found on the pipes: lack of CO₂, have to wait until March 8.

Decided to dismount S5D and replace it by S3B.

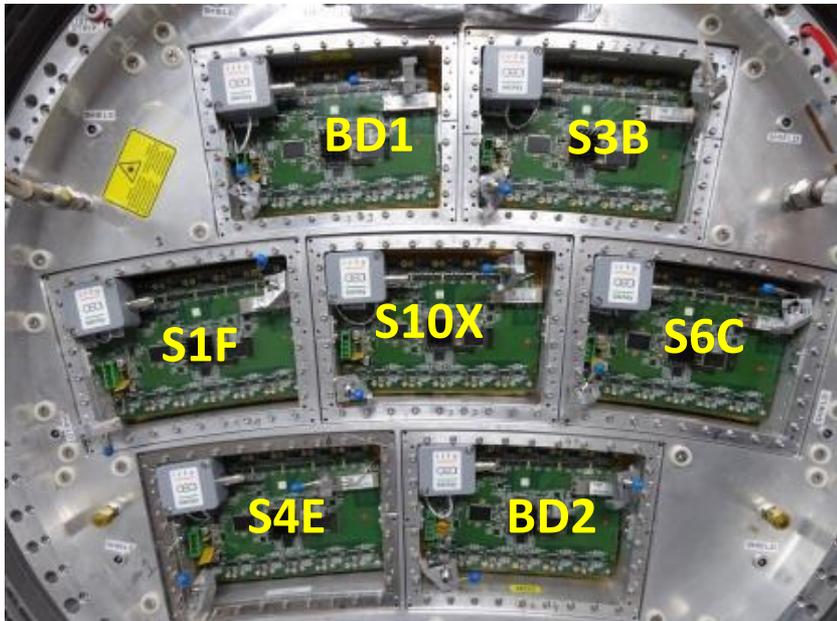

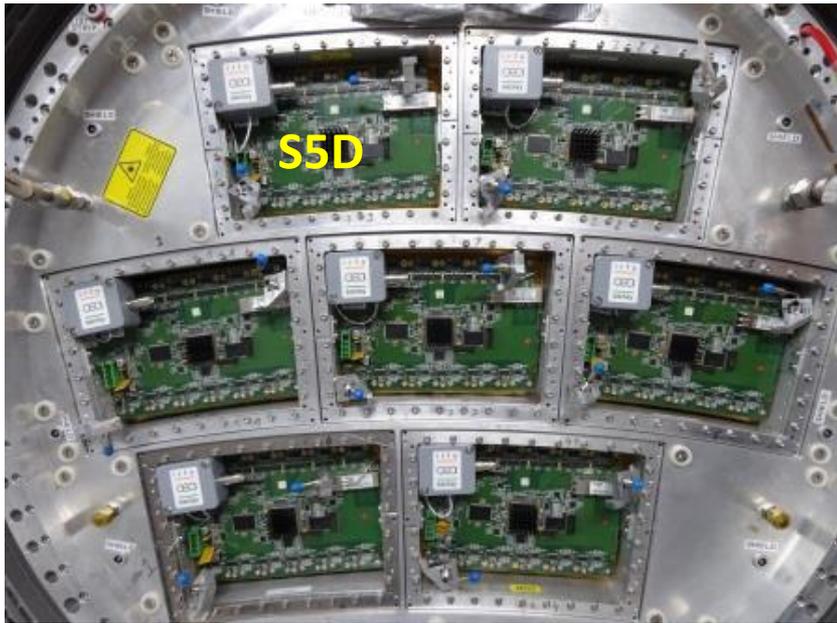

BD2 limited to 370 V.

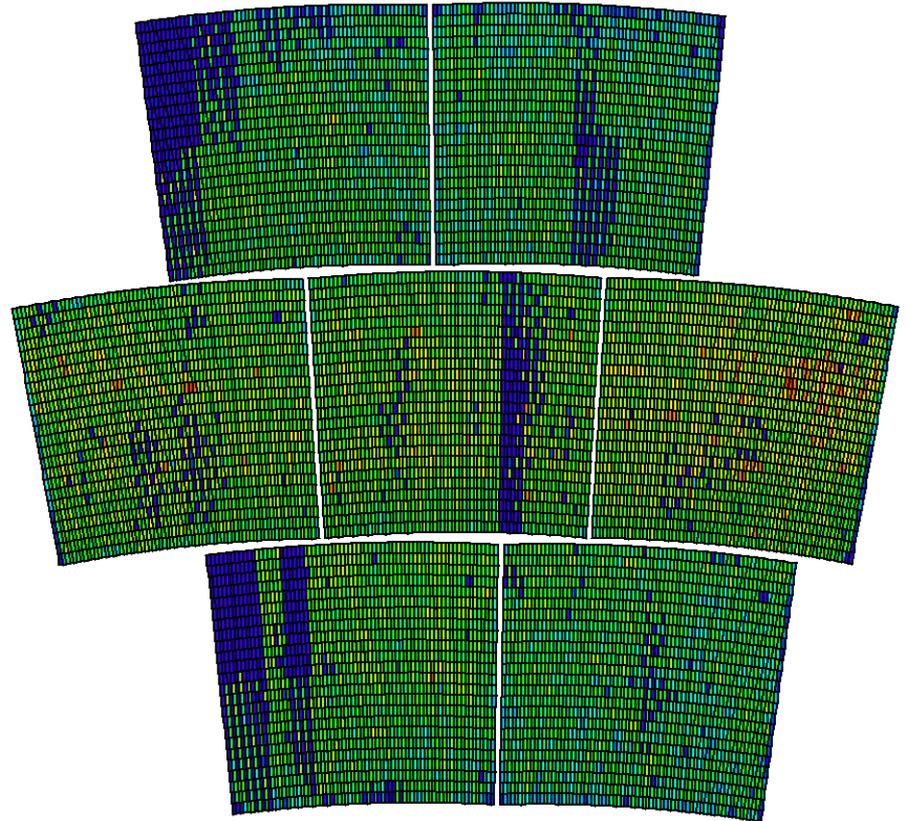

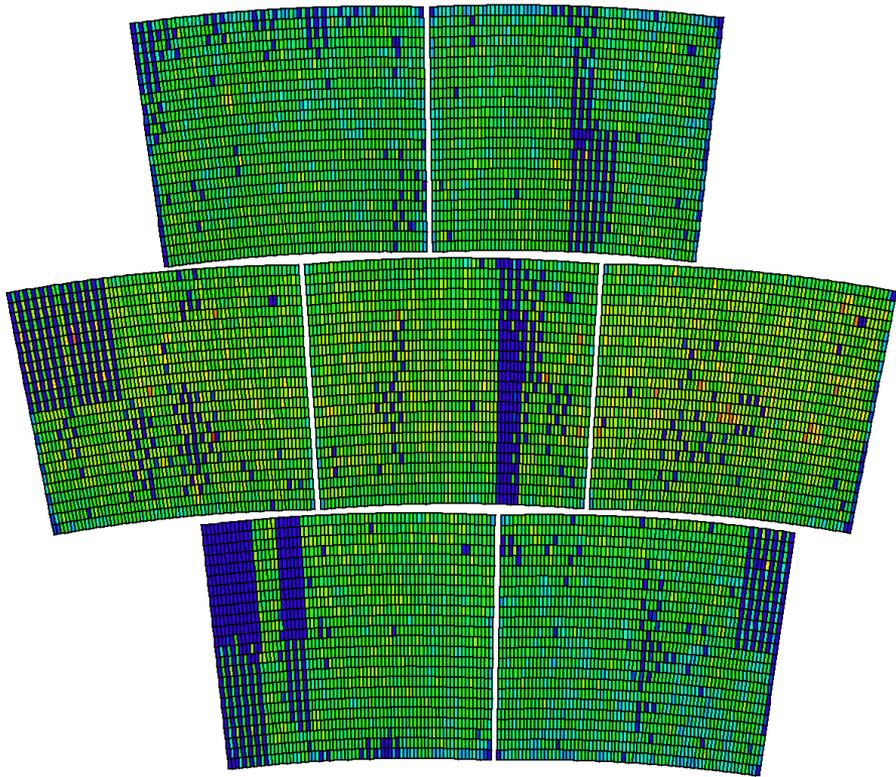

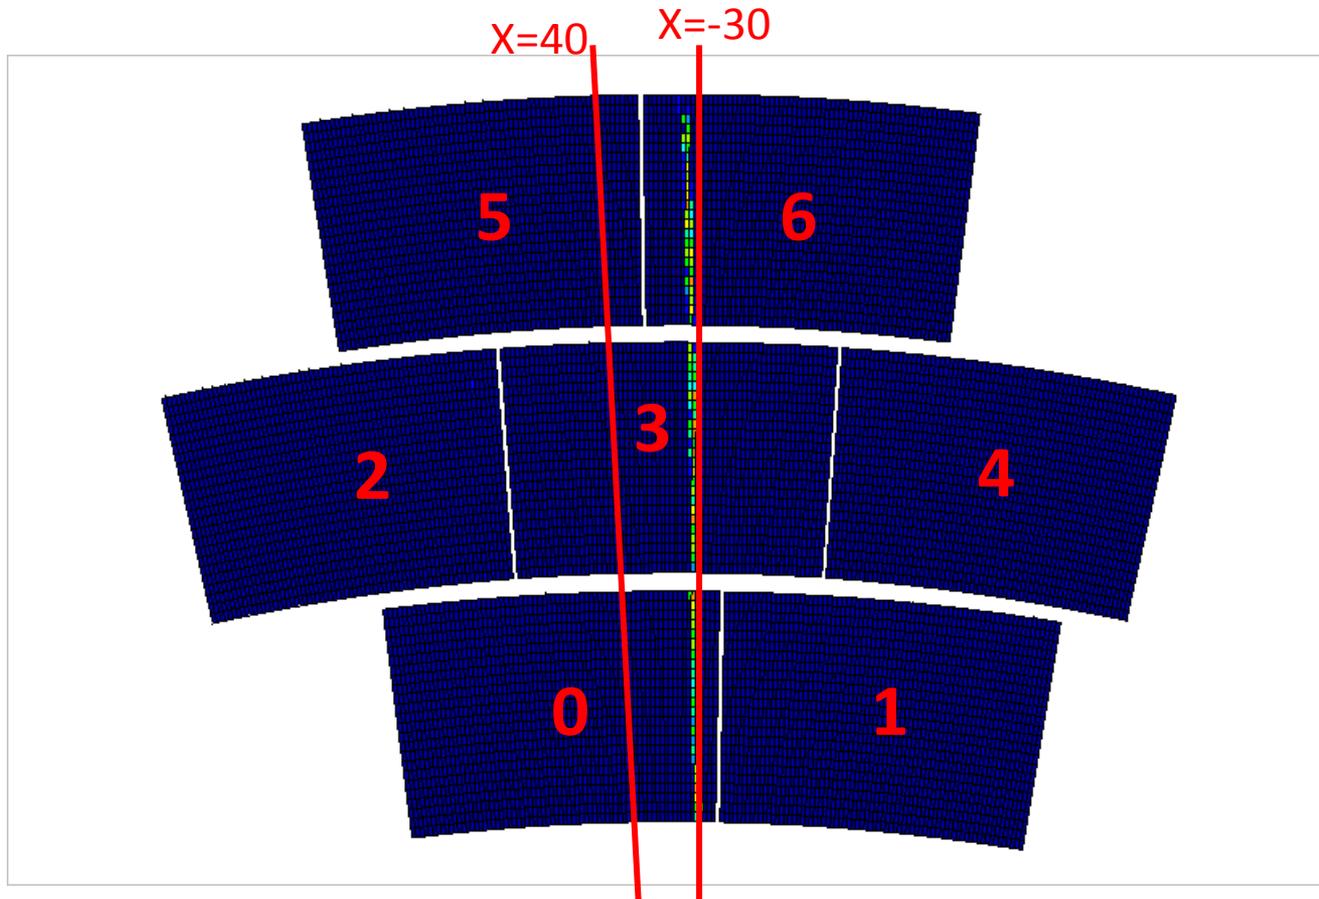

Frost deposited on the pipes (-10 °C)
