

Minutes of WP-meeting 398

Attendance:

Zoom: Ralf Diener, Ulrich Einhaus, Jochen Kaminski, Shinya Narita, Ron Settles, Jan Timmermans, Maxim Titov, Mingrui Zhao

General News:

Maxim has stressed that only a very few institutes completed the document expressing their interest in large volume TPCs and returned the DRD1 template for workpackage 4 and 8 (both TPCs), none was of LCTPC yet. He mentioned that this can be considered as a bad sign by our funding agencies and more institutes should go through the effort to fill it out. Otherwise, this might be interpreted that community is not interested anymore in TPC's developments for future large scale facilities and resources from funding agencies will flow into other detector types.

AOB:

The next workpackage meeting will take place on August 10th.
