IP-BDS area sub-tunnel proposal and progress of the 3D CAD models of ILC

Tuesday 9 July 2024 11:00 (20 minutes)

The proposed sub-tunnels are considered necessary for the construction, installation and operation of the BDS and beam dump. It would also provide access to facilities such as a laser room for polarimetry, a preparation room for beam dump experiments and magnet power supply rooms. A constantly updated 3D CAD model will also be presented.
