

# Physics conveners report

A. Filip Zarnecki (U. Warsaw)

Taikan Suehara (ICEPP, U. Tokyo)

# ICHEP2024 (Jul. 18-24, Prague)

- Abstract submission deadline: 29 Feb. (tomorrow!)
  - ILD abstracts (submitted)
    - #600 The International Large Detector as Detector Concept for Linear and Circular e+e- Colliders (Kyotomo for PSB)
    - #576 Probing GHU models at the ILC with di-quark AFB at c.m.e. above the Z mass (Pedro Marquez Hernandez)
    - #860 Searches for new exotic scalars (Filip)
    - #803 Long-lived particle searches with the ILD experiment (Jan Klamka)
    - #378 Prospects for constraining light-quark electroweak couplings at Higgs factories (Krzysztof Mekala)
    - #1014 High level reconstruction with deep learning at ILD full simulation (Taikan)
    - Probing CPV mixing in the Higgs sector in VBF at 1 TeV ILC (Natasa)
    - Higgs self-coupling measurement (Brian)
    - Exploring hidden sectors with two-particle angular correlations (Emanuela)
    - Stau searches at ILD and ILDcc (Teresa)
  - More to come (?), let conveners & PSB if you submit an abstract

# LCWS2024 (Jul. 8-11, Tokyo)

- Registration & abstract submission open  
<https://agenda.linearcollider.org/e/lcws2024>  
Abstract submission deadline: 26<sup>th</sup> April
- New features in LCWS:
  - Refereed proceedings
  - Poster session (with awards)
  - Student support: waiver of registration fee (for limited number)
- Please consider to come to Tokyo!
