Internal Review of ILC Cost-Update

2024 Nov.14

Shin MICHIZONO

It has been more than 10 years since the ILC was estimated at TDR. In addition, general prices have been rising rapidly in recent years. In response to them, a task force (ILC Cost-update Taskforce) under the IDT has been working on ILC re-costing since May 2024. This Internal Review to be conducted under IDT-WG2 is positioned as a pre-review for the External Review* scheduled in December 19th and 20th. The important thing is to make sure that the ILC cost-update materials may be well understood by the External Review members.

[Charges]

1. Does the Cost-Update properly reflect the technology advances, dynamic market/sociological changes, and escalation?
2. Does the Internal Review become a good preparation (or rehearsal) for the external review?
