

Minutes of WP-meeting 429

Attendance:

Zoom: Paul Colas, Jochen Kaminski, Peter Kluit, Ron Settles, Jan Timmermans, Maxim Titov

General News:

Jochen discussed the agenda for the LCTPC-CM (<https://agenda.linearcollider.org/event/10563/>)

Paul mentioned that there were some FCC meetings where new background calculations were shown. The work by Daniel Jeans and Victor Schwamm include new ideas how the background could be reduced by a factor of 10-20. But it is not clear if they can be implemented, as an anti-DID is claimed to be not possible in a circular collider.

AOB:

The next workpackage meeting will take place on February 13th.
