

## Minutes of WP-meeting 454

### Attendance:

Zoom: Paul Colas, Jochen Kaminski, Oliver Schäfer, Ron Settles, Jan Timmermans, Maxim Titov, Kanako Watanabe

### General News:

The participation of LCTPC at the FCC-ee WS: Tracking and PID

(<https://indico.cern.ch/event/1660971/>) was discussed. Maxim will submit an abstract and Jochen will give a presentation via zoom.

There will also be a DRD1 Workshop on gaseous detectors for the FCC-ee. It will be a ½ or a full day event. The date will be fixed soon.

In November also a FCC-France WS will take place in Marseille. This is a regular meeting which is held together with the Italian community every second year, but not this year.

### News from the groups:

Saclay and Iwate are preparing an application to the French Japanese network. Last year no money was granted, but they hope to get it this year for IBF measurements at CERN. Kanako would then come to CERN and perform the measurements with the gating GEM.

Kanako had given a presentation at the Japan Physical Society Spring Conference. There were two questions, one concerning the phi-dependence of the distortions, and the field distortions close to the wall of the TPC.

### AOB:

The next workpackage meeting will take place on April 9<sup>th</sup>.
