

Minutes of WP-meeting 462

Attendance:

Zoom: Ritsuya Hosokawa, Jochen Kaminski, Shinya Narita, Oliver Schäfer, Ron Settles, Jan Timmermans, Kanako Watanabe

General News:

On September 7th we will meet with the new ILD spokesperson, Mary-Cruz, to discuss the status of the TPC. Last time we discussed to prepare a plan of what should be done to establish (or to refute) the feasibility of a TPC at FCCee. Only Ron had prepared some comments, which he will send to Jochen. Anybody else, please send comments/idea to Jochen.

PCMAG/LP setup, test beam:

Oliver: Test beam schedule: last 2 days – accelerator ramping up already

- The summer shutdown is almost over, the accelerators are ramping up again and they do beam studies to improve luminosities and backgrounds.

AOB:

Daniel Jeans will soon leave KEK and take a new job in the UK. As he was the contact person for the item on loan from KEK, in particular PCMAG and the cooling system TRACI, he has to be replaced. He is currently looking for someone else but asked Oliver for photos of inventory number. The technical support of PCMAG was done by Makida Yasuhiro and Kawai Masanori, who know the PCMAG very well from the initial installation and also from the refurbishment with the cooling heads.

The next workpackage meeting will take place on August 6th.
