

Minutes of WP-meeting 466

Attendance:

Zoom: Paul Colas, Jochen Kaminski, Oliver Schäfer,

General News:

Paul reported that there was a meeting yesterday (14.10.) initiated by Mary-Cruz to restart planning of the work left to be done. A list of what to do was discussed. Main topic was software, which will also be the main topic of the next meeting 28th of October. But also TPC topics were discussed.

Paul thinks we should get it touch with AGORA people (same as CEPC-TPC people) and WP4.

PCMAG/LP setup, test beam:

Oliver: test beam area:

- Oliver clean up the TPC related stuff in the T24 are. Some old equipment, which is no longer used, was discarded, like an old slow control computer, etc.

News from the groups:

Paul said, that Kanako has arrived at CERN. She and Serguei are preparing the setup. Sofar, they have only found 1 gating GEM with the size of 10x10 cm². There should be more, but they are still looking for them. Oliver will check the equipment stored at DESY, if there is a second one. Jochen has one with LP module size, which does not fit the test detector.^

AOB:

The next workpackage meeting will take place on October 22nd.
