

SiD Workshop in Spring 2007

The 2 days workshop at SLAC, Oct 26 -28 was very successful and useful

SiD needs to meet regularly to make progress on “design” of the detector concept.

Period: twice/year

Proposal: meet at Argonne or Fermilab on Monday April 9, end in afternoon of Wednesday April 11.

Additional reason: April 12-14 is an LHC-ILC workshop at Fermilab.

Argonne or Fermilab? How to choose ?

Main reason for workshop: start work on “CDR”, after the cost for ILC has become public in February and hopefully there is a clearer path for detector concept studies and may be even collaborations. “Define path” SiD for the next two years.

Preliminary Agenda
SiD workshop at Fermilab: April 9-11, 2007

Monday April 9, 2007 (day after Easter)

13:00 Start of workshop; 30 minute charge & intro (plenary)

13:30 Working groups: need agendas and not everybody HAS to meet

17:00 End of first day

Tuesday April 10, 2007

8:30 – 17:00 Plenary meeting all day, overview talks

18:30 SiD dinner

Wednesday April 11, 2007

8:30- 15:30 Plenary meetings, overview talks

16:00 Colloquium and start of LHC-ILC workshop

If it is not a LHC-ILC colloquium, could be a SiD one ?

Thursday April 12 – Saturday April 14, 2007

LHC-ILC workshop at Fermilab.

SiD attendance would be VERY GOOD for all involved.
