

Next Steps with the DCR

SiD Advis 3/12/07

J. Jaros

Schedule:

The draft DCR was scheduled to be released March 1. It's still not out, but should be within the next few days.

The month of March is intended to be a time for the community to read and comment, and for the text to be finalized. It will also be the time to build an author list for the DCR.

The DCR is supposed to be complete and final by April 1, the date at which the RDR is also to be complete.

The DCR can be found on the ilc wiki:

http://www.linearcollider.org/wiki/doku.php?id=dcrdet:dcrdet_home

SiD Homework:

Please read and send along comments (to john@slac.stanford.edu) at least the following DCR chapters:

- The SiD Concept section of Chapter 3
- Subsystem Performance (Chapter 5)—especially as it pertains to your subsystem.
- Subsystem R&D (Chapter 6)—for your subsystem

Your comments are also encouraged on the rest of the document, on any and all aspects.

Please send in your comments soon, so they can have an effect.

DCR Authorship

Everyone who has contributed to LC studies, or intends to, is encouraged to sign the DCR. Certainly everyone who signed the SiD DOD should sign the DCR as well; ditto, those who signed the other DODs.

Email messages will be sent around in the next week encouraging everyone to sign, and providing a mechanism for doing so.

Please sign up.

DCR Review

The WWS is putting together a review board to comment critically on the completed document, likely sometime in April.
