

Argon Ion laser

- Axel setup the following items:
 - Temperature and humidity monitor
 - Power monitor
 - Beam profile monitor
- Coherent Innova laser in the old PEP control room
 - Marty Breidenbach's collaborator owns this laser.
 - We are allowed to take the laser.
 - Plan is to take the laser to Femtosec lab and test it there before we can decide if it is worth trying this laser at G215.
 - Need to write a temporary SOP.
