

Plans for SiD Meeting at LCWS07

Meeting on Friday 12:30-14:00

Must allow time for people to get lunch. Start 12:45-13:00.

Please attend if possible.

Proposed Talks.

**Talk 1: Intro to SiD** 10-15 min. SiD Person

1. Very brief SiD overview
2. Some of SiD's outstanding problems
3. What SiD's trying to do: Put together an LOI by Summer 08
4. Great time to join. Major SiD issues still to be decided; SiD is open to new ideas that fit in our general framework. New contributions needed and welcome.

**Talk 2: How to get involved in SiD.** 10-15 min. SiD Person

1. What Subgroups need to do for LOIs
2. Possible projects for each subgroup. High priority, definite, collaborative with SiD.

**This needs input from subgroups.**

**Talks 3: Several Invited talks from New Collabs.** 5-10 min each.

**Subgroup leaders must do some homework to arrange these.** Invite participation from particular groups, work with that group to find an area of mutual interest, bless the contribution that the group would talk about.

Possibilities:

1. SiLC Forward tracker design choices. Who?
2. LCFI Evaluating vtx mech structures; devising powering Schemes. Who?
3. LCFI Benchmarking vertex detector performance. Worm? Hillert?
4. Si/W Params for the ecal. Need more segmentation? Justify Si/W? What E res? RAL Maps group?
