GTL Report

Gun Operators (approved or in training): Brachmann, Clendenin, Galetto, Maruyama, Zhou

Meetings: For the near future we will meet weekly at the GTL on Fridays at 13:30. The first such meeting was on the 13th. We discussed [near term tasks](#). We want to accomplish the near term tasks before Tom leaves on vacation on the 28th.

Longer term goal: Restart and check out the gun, beamline and Mott system in time to begin serious cathode studies (polarization, QE, lifetime, surface charge limit) in the fall.
