

Proposal for Concept Meetings at ALCPG (J. Brau)

We will plan parallel sessions on the various detector R&D topics, as we did at the Vancouver meeting. We expect many of the concept topics to be discussed in those R&D meetings.

In addition we would like to schedule some time during the workshop for meetings specifically of the concepts. Our proposal is the following:

- 1 half-day available during the early part of the meeting (perhaps Tuesday) to schedule concepts meetings
- 1 half-day after the meeting ends mid-day Friday, namely Friday afternoon, to schedule concepts meetings

Finally we would plan a plenary meeting during the week for reports from each of the concepts, and presentations and discussions of common interest to the concepts, such as the roadmap.

Please advise us if these sessions will satisfy your needs for the ALCPG Workshop.
