

# TB preparation – Discussion

- 1) Last changes to DAQ / converter / online monitor (bring everybody up to date)
  - Japanese DC
  - trigger system (a.m.a.p. same as at CERN), more display?
  - Cerenkov integration in trigger logic trigger
  - more requests from the users / shifters ?
  
- 2) Plan B: what if no Cerenkov trigger
  - possibility of beam studies between first and second beam period?
  - can ECAL and HCAL run out of beam periods?
  
- 3) Role of remote control room (RCR)
  - 1 remote shifter only (for the beginning)
  - support to main control room / run in parallel
  - only small number of RCR possible
  
- 4) Running time (day/night): 6am – 6pm
- 5) July run period dates: 7-29 July
