

## CALICE meeting - ANL

I am sad to announce you that [Vincent Lepeltier](#) died this morning by heart attack

He was a strong supporter of ILC in France  
Working at ORSAY-LAL on the TPC for ILC detector

But more important, he was a nice guy , with humour feeling  
and with a very gentle man , full of human qualities

- 47 talks !! Due to the parallel sessions of the first day  
May be an experience to extend ??
  
- About 50 participants ,  
could it be considered as a first response to the “black December” ?
  
- 2008 is also  
Fermilab test beam coming in April-May , July , and September  
DESY/CERN TB for technical test beam
  
- 2008 MUST also be  
The first year of the papers on TB data !!! **WE ARE WAITING FOR !!**

## CALICE meeting - ANL

Technically and understanding the performances, we are progressing on Si-ECAL, Sc-ECAL, AHCAL, DHCAL, we are making a lot of progress, understanding .....

I see with pleasure that everything goes in place to have ECAL-HCAL test beam at FNAL (i.e. DAQ soft for DHCAL)

shifts for May TB @FNAL are already covers !!!!! Thanks to all  
(and for the analysis groups to be ready for analysis)  
Questions and shifts proposal to Erika, Roman  
Web site accessible from CALICE web site

## CALICE meeting - ANL

Analysis meeting organised by David and Nigel help a lot to progress and are very useful

PLEASE, do not hesitate to show there your progress, it will help you since it is also a forum place to discuss

ALL information on the analysis and simulation is accessible from the CALICE web site

WIKI CALICE site is accessible for all . It will contains what you will put on it. There is already a lot to help, even if a kind of “analysis software for pedestrians” Is still missing

**NOTE:** TWiki in maintenance mode. Read-only access

## Welcome to the CALICE wiki

Members of the [CALICE Collaboration](#) are encouraged to update these pages.

[Test beam](#) [Calice Software](#) [ILCSoft](#) [Speakers' Bureau](#) [Analysis Meetings](#) Mailing lists: [CALICE](#) [CALICE-SW](#)

New CALICE User? - [how to register](#) and [how to contribute to these pages](#)

### Main Topics

- [AnalysisTips](#) - always evolving page to help analysers: contributed by analysers for analysers
- [GoodRunList](#) - what data do we consider good enough to look at?
- [MonteCarloProduction](#) - technical discussion of submission/book keeping
- [MonteCarloSampleWishList](#) - samples needed to understand the detector behaviour
- [ResourcesForTalks](#) - images, plots, etc. for preparing talks and presentations
- [CaliceInternalNotes](#) - unapproved notes. **Only for internal use by members of the CALICE Collaboration.**
- [MapsGroup](#) - home page for the MAPS people

### Available Information on Wiki usage

- [UserDocumentationCategory](#)
- [CERNTWikiFaq](#)
- [TWiki.org support](#)

### CALICE Web Utilities

# CALICE meeting - ANL

New groups are joining

- > Wuppertal University
- > Koreans group from KIRAMS, KAERI and SKK univ.
- > Gerald Eigen from Bergen Univ. propose to join officially

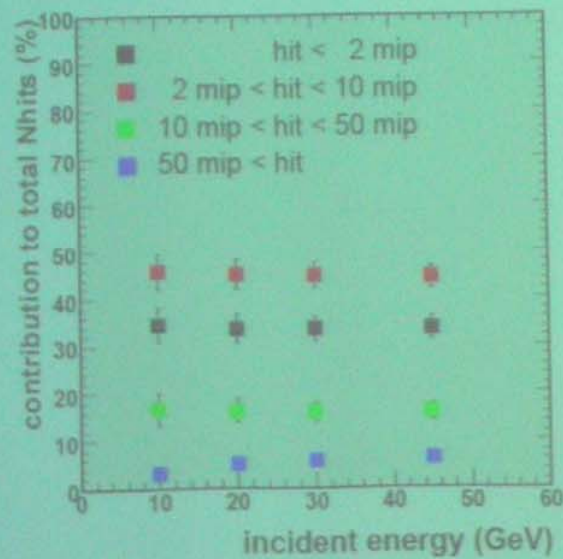

CALICE is now an official experiments at :

DESY (02/01)

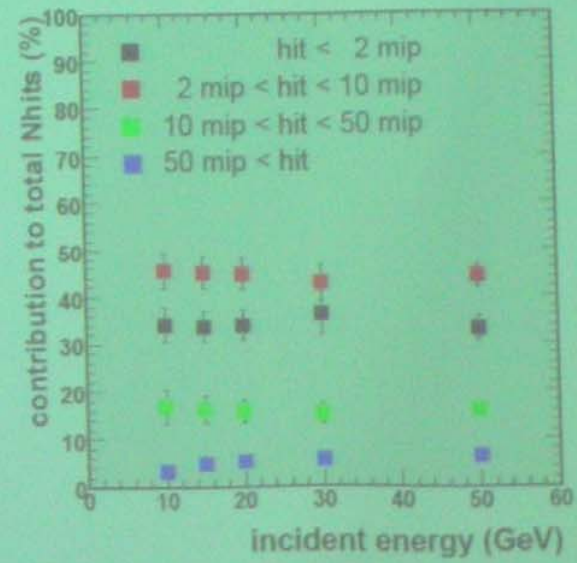

CERN CALICE

FNAL CALICE (T978, T9...)

## Shower composition wrt Nhits

(electron data CERN2006)

(positron data CERN2006)

**But it is also**

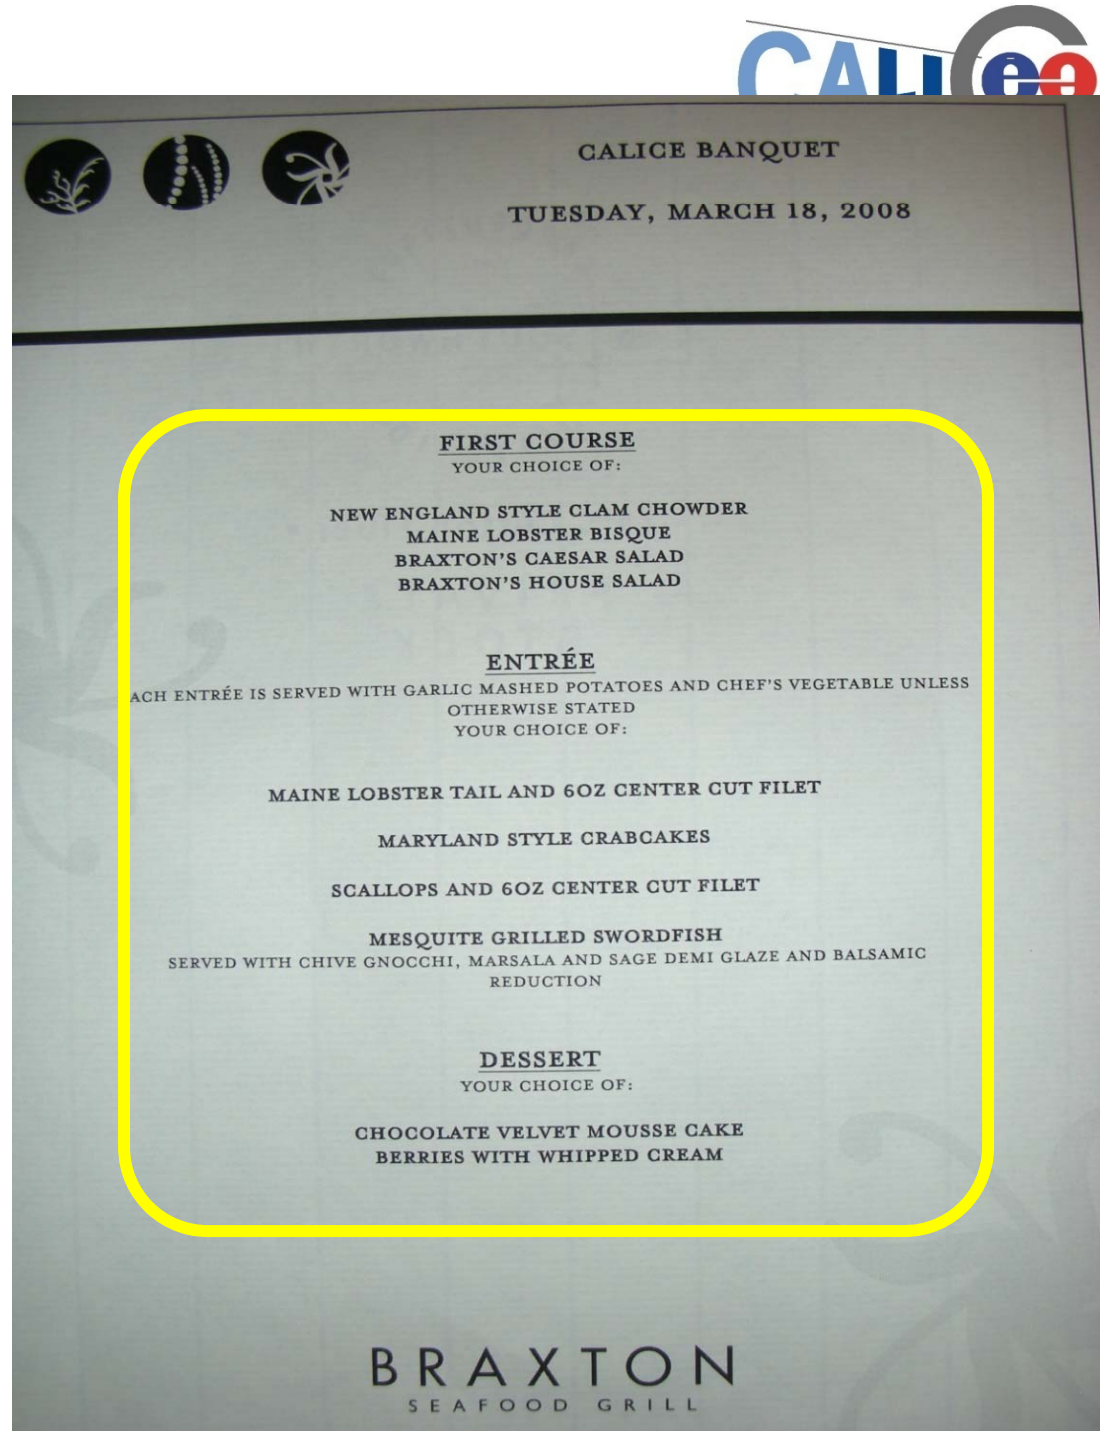

# CALICE meeting - ANL

While not written,  
the wine was also there !!!

and the good “ambiance”  
in the bus at he return is a good  
proof

## CALICE meeting - ANL

Thanks to José REPOND & all people from ANL for their help and hospitality

Thanks to Sandy for his very kindly help

Thanks to all people helping for a successful meeting

# CALICE meeting - ANL

Important place to go for us !!!

FERMILAB (TB)

CALOR08 (NEED to be there to have solid response to some DREAMers people)

ECFA 08 – Warsaw

Next CALICE week will be in Manchester, 2<sup>nd</sup> or 3<sup>rd</sup> week of September/or  
If possible in October (to avoid overlap with Sc-ECAL Test beam)
