

# Sendai Plans

February 19, 2008

John Jaros

# TILC08 at Sendai March 3-6, 2008

- **SiD Contingent:**  
Aihara? Brau, Burrows, Demarteau, Graf, Jaros, Stanitzki, Zutshi
- **SiD Plenary Talk Monday 3/3** Phil
- **Draft SiD Parallel Session Tuesday 3/4 (15 min talks)**

Lol Plans, Engineering, KPiX	John
Tracking and VXD	Marcel D
ECAL	Marcel S
HCAL	Vishnu
Sim and Recon	Norman
Discussion and Questions	All
- **Meet New Groups Friday 3/7** All

Right Topics?

# Homework for Sendai

- **What should parallel meeting include?**
- **What should talks discuss?**
  - Help needed.
  - Possible projects.
- **How to get an audience?**
  - Must invite TILC participants to SiD parallel meeting.
  - Who invites whom?
- **Arrange for meetings on Friday**
  - Who from SiD is available?
  - Inform TILC organizers

# Signing the SiD LoI

Letter to Alberto Ruiz about Spanish Involvement in SiD:

1. Sakue Yamada, the newly appointed Experimental Research Director for the ILC physics program has suggested that most of those signing an LoI should consider signing only one such letter.
2. ...we have decided that those signing have to make contributions to the present design, relevant detector R&D, or benchmarking and engineering activities. We also expect that they remain active in SiD as it moves beyond the LoI into detector proof of principle R&D, more refined detector engineering, further benchmarking and performance studies, and refinement of the design.
3. While we welcome involvement in any of a wide range of areas, we would especially appreciate efforts that would help in preparing the LoI itself. SiD is short on manpower devoted to simulation studies.
