

## **Extract from DESY PRC #65 minutes**

- **TPC**

The PRC congratulates the LC TPC collaboration for making a good step forward. The collaboration produced convincing new results and has grown worldwide. The PRC recommends the collaboration to get a large prototype detector going. There is still a lot to do to make it work and to learn about operations, calibrations, data corrections and field corrections. The PRC recommends that the TPC collaboration puts more effort into simulations and correction tools. These will allow the collaboration to study effects of endplate thickness on calorimetry, to simulate various detector conditions, and to simulate physics performance for detector choices.
