

DHCAL Analysis Tools

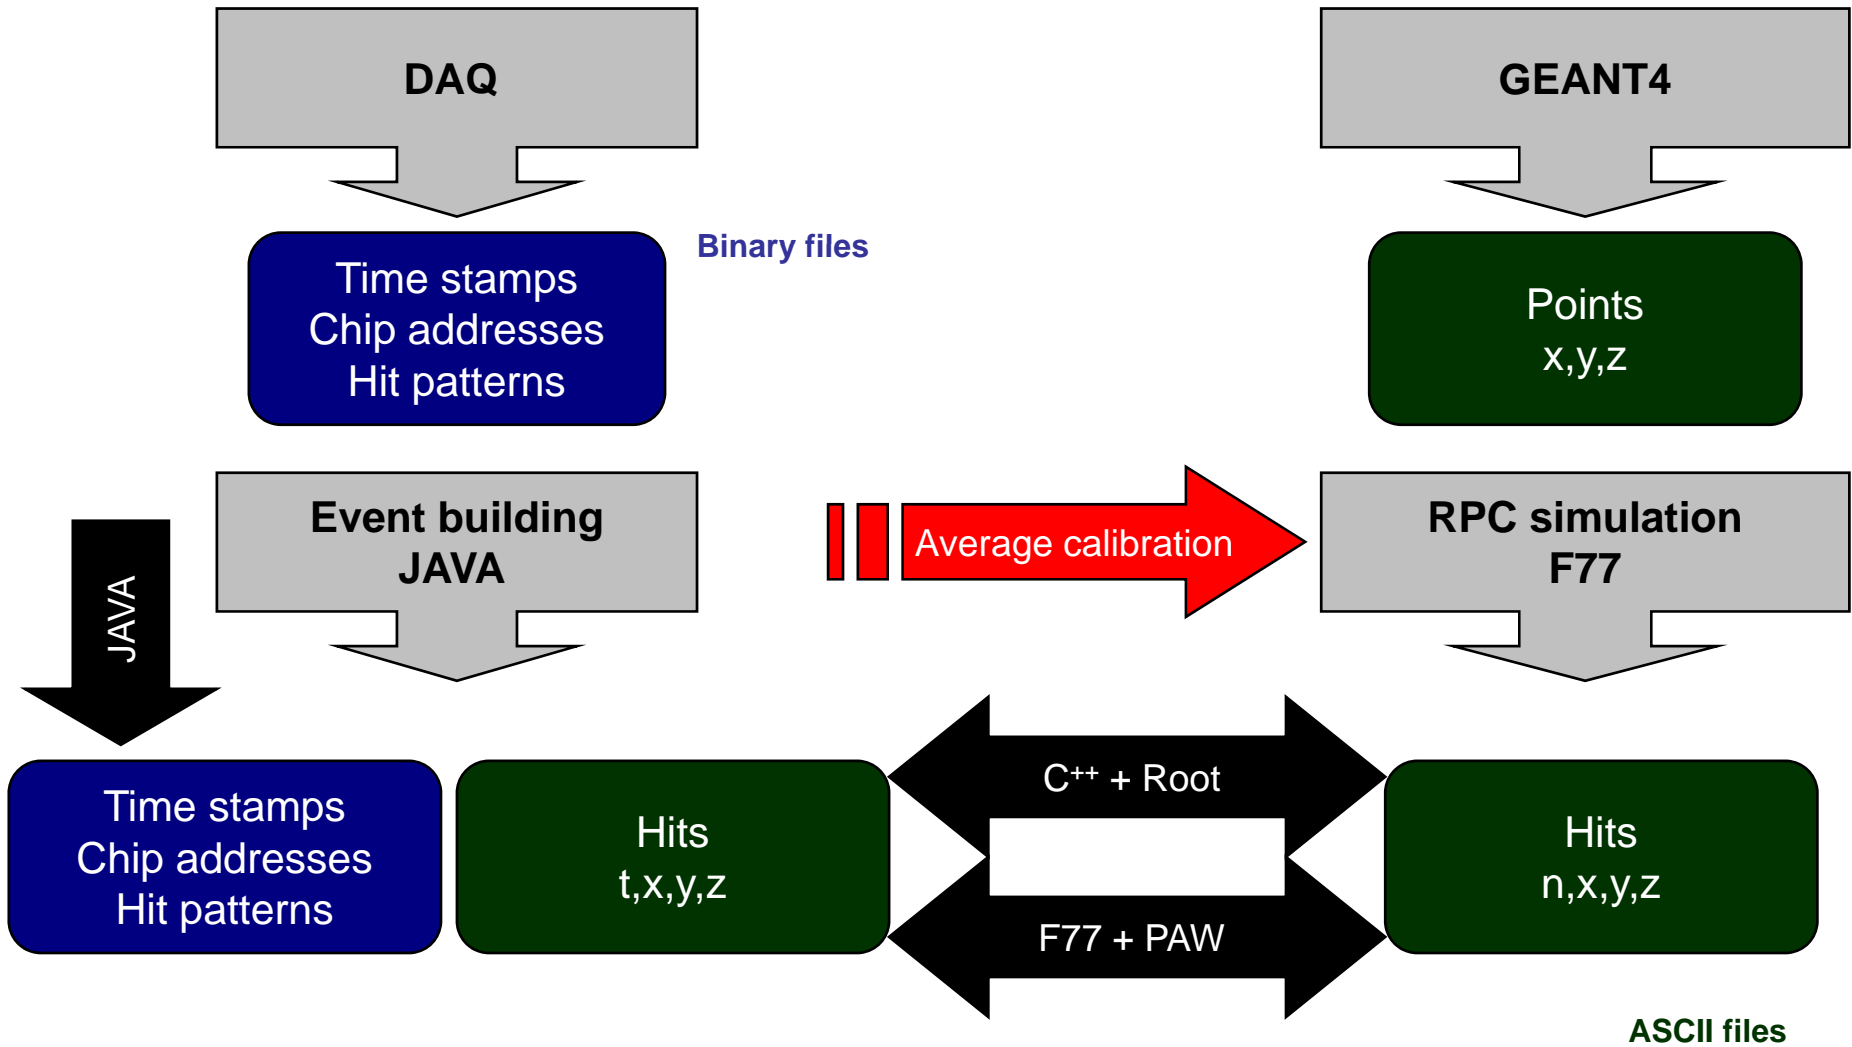

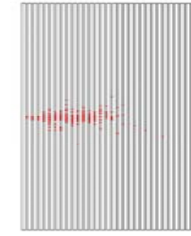

José Repond
Argonne National Laboratory

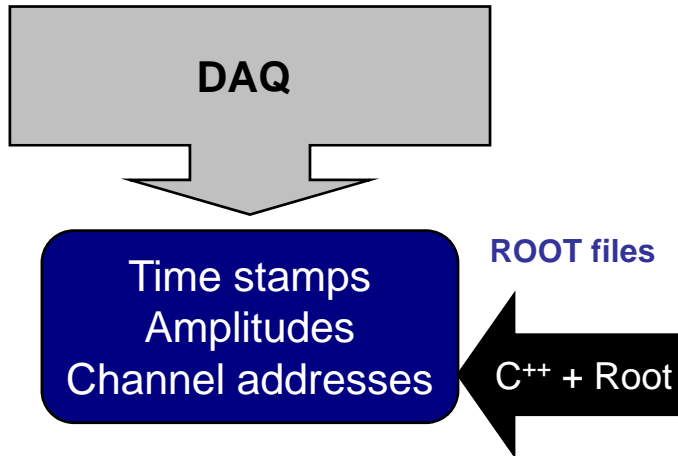

CALICE Meeting, February 19 – 20, 2009
Kyungpook National University, Daegu, Republic of Korea

Data Flow – RPC

Data Flow – GEM

Breaking news

Burak Bilki (Iowa) translated the VST data into LCIO

(took him a few hours to figure out how to do it)

Possibility to include 'methods' for cluster and track finding

Still to understand: how to implement calibration constants (ϵ, μ) for individual layers
