

# ILC/CLIC Collaboration for CFS Works in 2009

J.Osborne / V.Kuchler - ILC Global Systems Meeting 28 Jan 09

## Main CFS collaboration efforts in 2009 :

- Develop a safety document compiling information that exists for other similar scale projects eg LHC, XFEL, Project X, SPL/PS2 etc.

Chapters for ILC and CLIC to be included using same document structure.

- Transport and installation study for ILC to be performed, similar to the study carried out in 2008 for CLIC.
- 3d modelling using CATIA software for the tunnels/caverns in the Positron source area. Initially for the RDR design, later for new Minimum Machine options.
- Update overall CE layout with latest machine developments
- Updated construction schedule for new layouts
- Updated cost estimates for CFS activities
