

## Agenda Proposal for Lyon

- R. Pöschl – Introduction (10 Min.)
- H. Li - Calibration of 2008 data ( Analysis session) (20 Min.)
- D. Grondin/J. Giraud – SiW Ecal Endcaps (20 Min.)
- M. Faucci-Gianelli – Studies with SPIROC2 ( □  
Electronics testbench?
- J. Giraud – Demonstrator studies in 2009 (20 Min.)  
Status and plans
- J. Bonis: Plans on integration and assembly of EUDET Module (20 Min.)
- R. Cornat – Status of Si Wafers (15 Min.)
- JCB (tbc) – Organisation of Si Wafer R&D (15 + 10 Min.)

### **What else?**

**EUDET Mechanics a bit missing but there is a mechanics session at Lyon**

**May have to clip of 5 Minutes from each talk**

## EUDET Annual Meeting 19-21 October at CERN/Univ. Of Geneva

- Time to present results of demonstrator studies
- Need to present working prototype
- Need to present ideas for transnational access  
Remember – In the eyes of Europe we have built an infrastructure which can now be used by others!!!!!!

### Ideas:

- Testing of new cooling devices (CERN?)
- Tests of new Si Wafers
- (Longer term) Hosting ScintEcal long slabs
