

Planning for ECAL meeting 14/15 January 2010

14th - technical discussions of electronics / DAQ
- testbeam analysis

15th

Morning

1.5 h testbeam analysis cont.
45m electronics status
45m DAQ status

Afternoon – SiW EUDET status & plans

10 min introduction (Daniel)
20 min alveolar structure (Mickael)
20 min slab integration (Patrick, Julien)
20 min thermal tests and simulations (Julien)

20 min FEV (Stephane)
20 min Si detectors (Remi)
20 min test-beam plans discussion

30 min road to 2012 discussion
