LCTW 2009 4th Follow up meeting 22/4/2010

Workshop Document

- Current status:

24 pages

Executive Summary - Complete but surely matter of discussion

Needs particular critical reading one the draft is complete!!!!

Review Section – Complete but matter of discussion

Calo Section - Incomplete (see later)

TPC Section - Complete with minor modifs to be done (References, avoid “we”)

Si/Vtx Section – Complete with minor modifs (Details on rates, Institutes in Table)

Daq Section - Complete with minor modifs

Soft Section – Complete with minor modifs

Sites Section – Incomplete (see later)

Infra Section – Complete

Conclusion - Complete but surely matter of discussion

Needs particular critical reading one the draft is complete!!!!

Review Section

- Brief note on history is fine

- (To my taste) Too much summary of IDTB07

Reader might get confused on what is actually summarised

- R.P. Would prefer

Brief reference to IDTB07 and then a few lines of achievements since then

Efforts of sites, Scientific results

Need to support Jae on this!?

Your opinion?

Calo Section

- CALICE part essentially done
- SiD Ecal needs to answer open questions

- FCAL, Dual parts still missing

Sites Section

- DESY, other European Facilities still missing

- Main authors are convenors of session
- What about “guest authors” (Lucie, Erik, Carsten)
Main authors or Acknowledgements ?
particular true for Erik and Carsten who I see more as “Site Managers”
After all it is a detector R&D document
- Acknowledgements still missing
Guest authors
“Hospitality” of LAL
- Appendix: List of participants

AIDA

- Recently approved by EU
- Testbeam efforts will clearly benefit from it
Allusions to AIDA at several places in draft (written during application phase)
Passages to be changed in view of AIDA approval
- Dedicated section on AIDA?

The next steps ...

- Aim for publication 30/4/2010

Maybe unrealistic

- Try to go for 7/5/2010

- LC Note

- arxiv paper after approval as LC-Note

- To be sent to

- LC Management

- Testbeam sites (CERN, DESY, FNAL, KEK, ...)

- Need final draft of contributions until ~29/4/2010!!!
