

Joint Working Group on General Detector Issues

Updated February 25, 2010

- ILCSC has encouraged formation of a CLIC/ILC General Issues working group on detectors by the two parties with the following mandate:
 - **Promoting the physics and the detectors of the Linear Collider**
 - **Identifying synergies between the detectors of ILC and CLIC in performance studies, detector R&Ds, and Software tools**
 - **Discussing detailed plans for the ILC and CLIC efforts, in order to explore possible collaborations such as critical R&Ds on sub-detectors, coil studies, push-pull mechanism and MDI aspects**
 - **Discussing a possible format of collaboration between the ILC validated detector groups and CLIC**

The conclusions of the working group will be reported to the ILCSC and CLIC Steering Committee.
