

# S1-G Cryomodule Thermal Data

# Accessing thermal data from the collaborative laboratories

- Data files of S1-G cryomodule thermal condition
  - Temperature sensors and strain gauges in the cryomodule
  - Pressures, mass flow rates of He gas and LHe levels in 2K cold box
  - Data sampling time= 1 minute
  - Every day, the data file will be updated.
    - June 7 ~ August 4, September 6 ~ End of this year.
  - We will prepare the accessible directory on the KEK Website.

# Data file

File Name/

Year-Month-Day-Day-Module A-Item

Item: T=Temperature, STG=strain gauge,  
P-F-LD=pressure etc.
