

Long-lived Stau

Jan. 21 . 2011

W.Yamaura

Event selection

Main selection

slepton tracks == 2
Number of jets == 2
for $Y < 0.004$
E jet ≥ 5 GeV

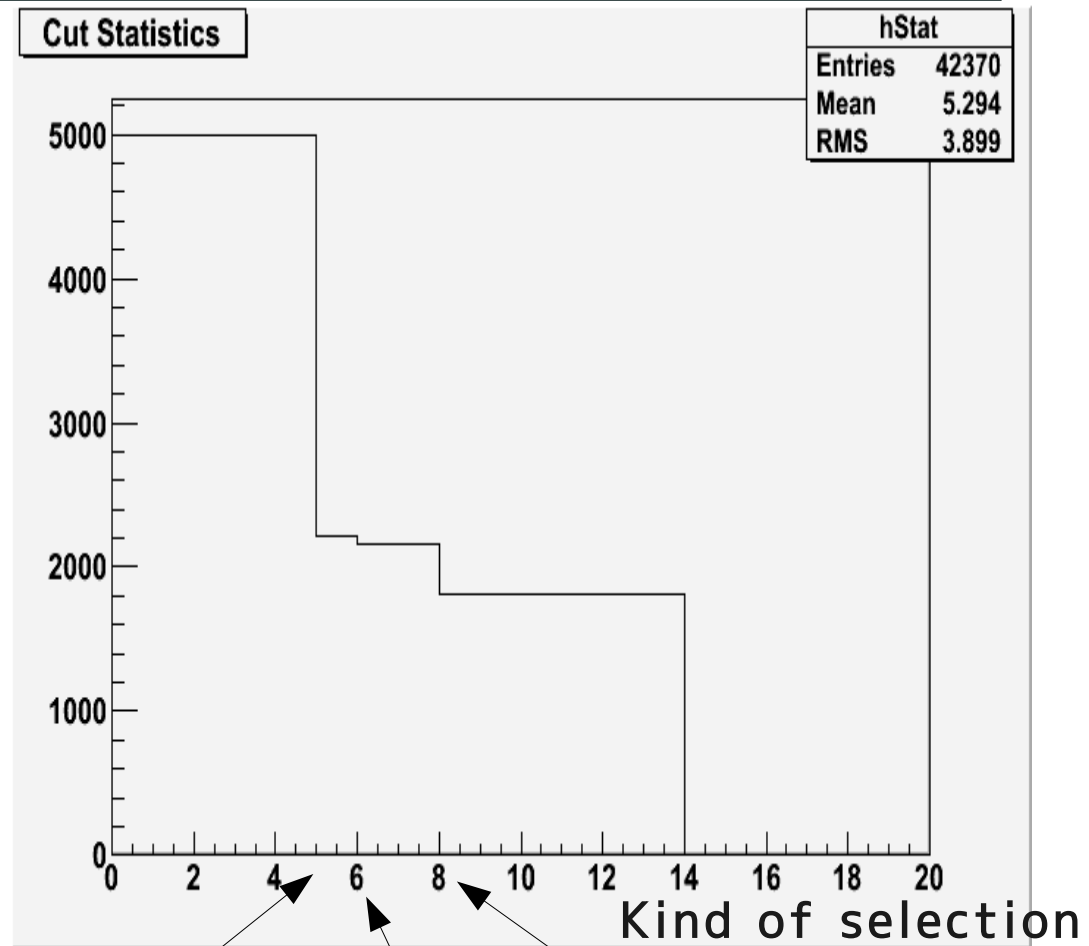

result

5000 → 1809 event

Slepton tracks
(2219 event)

N jets
(2155 event)

E jets
(1817 event)

Background

Regarded background

If ZZ or ZH cross section is smaller, BG is ignored
Calculate for ZZ mode and ZH mode
with MC simulation.

Generated numbers at 200 fb^{-1}

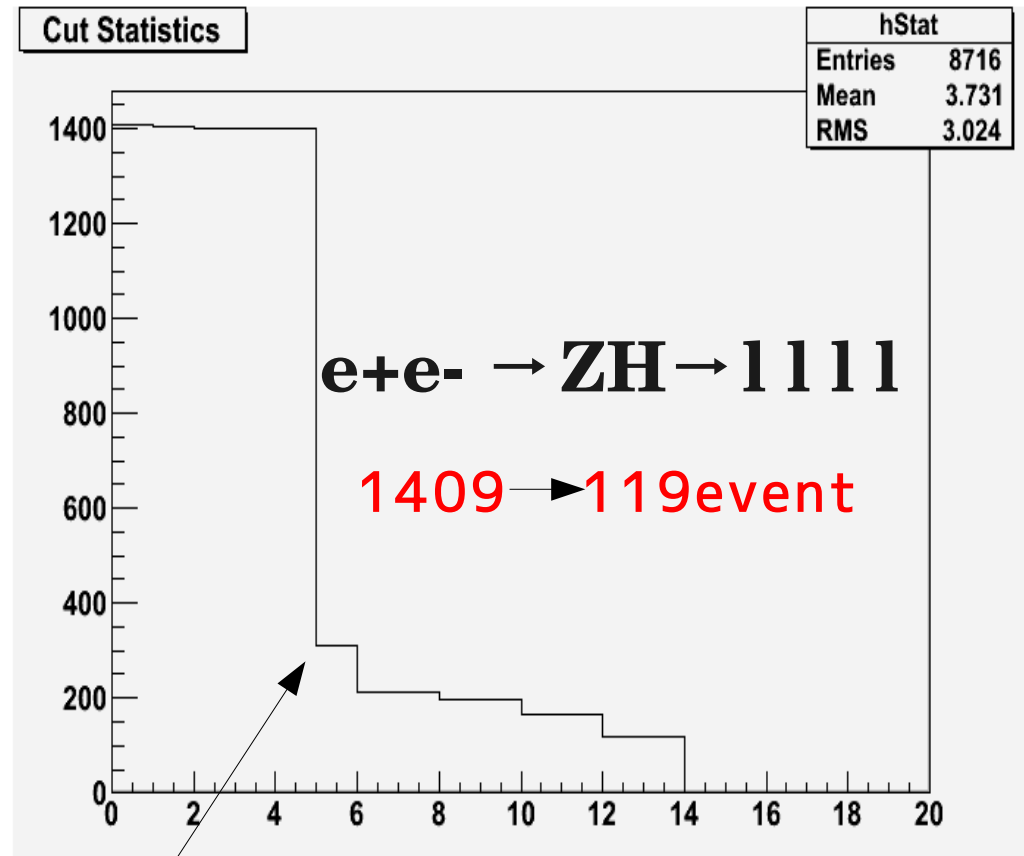

Background

$e^+e^- \rightarrow ZZ \rightarrow 1111$ (5.197 fb)

$e^+e^- \rightarrow ZH \rightarrow 1111$ (7.046 fb)

No polarization

Slepton tracks
(246event)

Slepton tracks
(309event)

Summary & Plan

- Make a list of BG mode.
- Try to fix an event selection
