

My question concerning to decay chain

Output from dumpevent (partially extracted)

index	PDG	[parents] - [daughters]
:		
24	6	[] - [26]
25	-6	[] - [26]
26	94	[24, 25] - [27, 28]
27	6	[26] - [29, 30]
28	-6	[26] - [46]
29	6	[27] - [33]
:		

(ttH sample)

What does this sequence mean?
I don't have to care about this?

example data file
