

tools related to cheated jet clustering

ilcsoft-v01-06

- ISRTaggerProcessor
identify the initial-state-radiated photons
- ColorSingletTaggerProcessor
find the originated color singlet for each PFO
find the B-hadron for each PFO if it is decayed from
- SatoruJetFinderWithCheatProcessor
combine the PFOs from a same color singlet
combine the PFOs from a same B-hadron
