Define Detector
Write DBD

Milestone
Finalise procedure

Milestone
Define Simulation
detector

Milestone
Define hardware
based detector

Important Milestones

- Simulation baseline:
    - Code freeze: end of December 2011: done
    - Material description: end of January 2012
    - Validation: February 2012

- Reconstruction code
    - Release December 2011
    - Software validation: January- March 2012

- Towards the detector baseline

    - Discussions within the subdetector groups / R&D collaboartions: -> May 2012
    - Discussions on baseline selection: ILD meeting May 2012

Proposed DBD milestones

- Define DBD outline: January 2012
- Define DBD editors and chapter editors: 15.2.2012
- Setup technical infrastructure etc.: 31.2.2012

ACFA meeting March 2012:
Present DBD sceleton to IDAG

- Start writing the "general" chapters: April 2012
- Deadline first draft for chapters: 31.7.2012
- Complete first draft for circulation: 30.8.2012

- Last possibility for "new" input: 15.11.2012

- Final draft for circulation: 15.12.2012

In particular the physics
and results sections will be
incomplete at this time!
