

7th Workshop on Polarized Positrons

POSIPOL 2012

4–6 September 2012, DESY, Zeuthen

International Programme Committee

I. Bailey, Lancaster U
E. Bulyak, KIPT
W. Gai, ANL
J. Gao, IHEP
J. Gronberg, LLNL
G. Moortgat-Pick, Hamburg U/DESY
T. Omori, KEK
S. Riemann, DESY
L. Rinolfi, CERN
J. Sheppard, SLAC
V. Strakhovenko, BINP
T. Takahashi, Hiroshima U
J. Urakawa, KEK
A. Variola, LAL
F. Zimmermann, CERN
F. Zomer, LAL

Local Organizing Committee

S. Riemann, DESY
F. Staufenbiel, DESY
G. Moortgat-Pick, Hamburg U/DESY
A. Ushakov, Hamburg U/DESY

Conference topics:

- Generation of polarized positron beams
- High intensity positron sources
- Positron generation and transport
- Physics applications of polarized positrons
- Polarized gamma ray generation
- Channelling radiation and positronium
- Physics applications of high quality X-rays and gamma-rays

Welcome to
DESY Zeuthen!

POSIPOL discusses issues of polarized sources and is addressed to the community working on linear e⁺e⁻ collider projects and on development of sources for industrial and medical applications.

Many thanks to DESY Zeuthen
and Hamburg University for
support

Schedule

- **Timetable and webex information** are available at www.desy.de/POSIPOL2012
 - **Sessions start at 9am every morning**
 - **The scheduled time includes already ~5min for discussions.**
