

Workshop on Top physics at the LC

Wednesday, March 5, 2014 - Thursday, March 6, 2014

LPNHE Paris

Scientific Program

For the international top workshop we have identified three topics (Preliminary):

- 1) Top physics at $t\bar{t}$ threshold (which may include direct $t\bar{t}h$ if new results exist)
- 2) Electroweak couplings and higher order elw. corrections
- 3) Tools (Generators for LC top quark physics)
