

- Service interrupt last week; KEKCC reported to group managers that
  - It was to apply a patch to fix a vulnerability found in kernel. It was used at intruded sites to access root account using a stolen user accounts
  - It took long time to test a patch
  
  - About 10% of KEKCC users stored a secret ssh passphrase in KEKCC.
    - they were used at intruded sites for unauthorized access
    - If found in KEKCC account, it was remove by operator.  
Don't store a secret passphrase in KEKCC.
  
- HPSS tape directory to store personal files ( not from GRID )
  - /hpss/ilc/grid/JB is ~84% in use  
/hpss/ilc/grid/JB/users are used to store personal files
  - New 7 tapes ( 28TB ) were added to /hpss/ilc. Another 7 tapes in March.  
Use /hpss/ilc/users to store personal files.
  
- To those who graduate. Congratulation.
  - Tell me([akiya.miyamoto@kek.jp](mailto:akiya.miyamoto@kek.jp)) if you are going to leave the ILC group.
  - Remove your personal files in disks and tapes or passed them to your successor
  - Send a form to remove your account to KEKCC.
