

ICHEP Resolution Plot and Proceeding

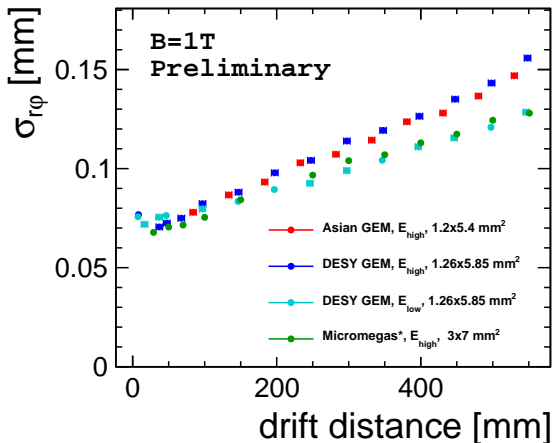

Astrid Münnich

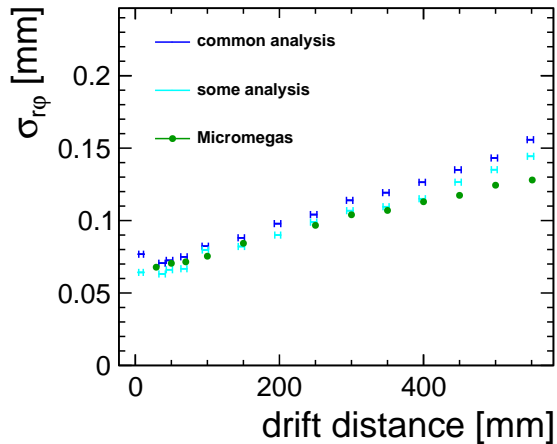

LCTPC WP meeting

17th July 2014

As shown in the talk:

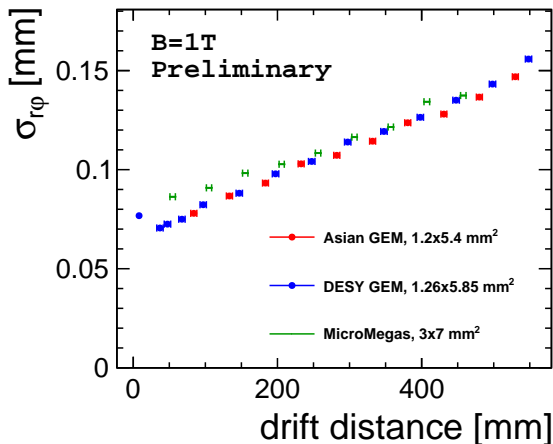

Not satisfied by it yet for proceeding.

Need to run the MM 2010 data to common analysis!

Why not show the 2014 data from the common analysis, if 2010 not ready?

Perfect agreement, no need for explanations and excuses for different standards!

Your help with collecting references:

- Description of Asian module
- Description of MM module
- Ion back flow simulation (Keisuke?)
- Anything in the talk to which you have/know a reference

Official deadline: 15.10.2014

Personal Deadline: beginning of September, submission by mid September
