

Minutes of WP-meeting 225

Attendance:

DESY: Ben Brüers, Ralf Diener, Ulrich Einhaus, Oleksiy Fedorchuk, Leif Jönsson, Claus Kleinwort, Paul Malek, Felix Müller, Volker Prahl, Oliver Schäfer, Dwayne Spiteri, Annika Vauth
Fuzebox: Deb Sankar Bhattacharya, Madhu Dixit, Takahiro Fusayasu, Jochen Kaminski, Peter Kluit, Amir Shirazi, Ron Settles, Jan Timmermans, Maxim Titov

General News:

Maxim announced that the report of the detector R&D liaison (~100 pages) will be finished within a few weeks now and that he would like to ask 4-5 pages maximum for each of the 4 different technologies, which will then be condensed to about 15-20 pages by the two liaisons to the LCC Physics and Detectors directorate Maxim Titov and Jan Strube. Besides, it is also important to fill out the table which Jochen will send around along with an example table from the vertex detector. In this table the projects and participating institutes will be described.

So, every institute is asked to respond to the table. Maxim has asked several people directly for the longer reports, which should be updated, if possible.

Jochen reported that for the MPGD2015 his abstract on the 160 chips module was accepted as oral presentation. Annika mentioned that the DESY abstract was accepted as a poster and oral contribution to the RD51 workshop and Deb announced that someone from Calcutta will present their work at the MPGD2015 too.

AOB:

The next workpackage meeting will take place on August 27th.
