

JAIfest 2015

Thursday 10 December 2015

Session 3 - Dennis Sciamia Lecture Theatre (13:45 - 15:45)

time	[id] title	presenter
13:45	[10] FLASHForward – beam-driven wakefield acceleration at FLASH	
14:05	[11] Status of the Diamond Light Source Upgrade	
14:25	[12] Design, development and use of the spectrometer for investigating coherent THz radiation produced by micro-bunching instabilities at Diamond Light Source	
14:45	[13] High Power THz generation using pre-bunched electron beams	
15:05	[14] Single short Smith-Purcell diagnostics: concept and progress	
15:25	[15] Development of room temperature THz detectors at RAL
