Nuovo Cimento **37** (1965) 1228

“While the storage ring concept for providing clashing-beam experiments (<sup>1</sup>) is very elegant in concept it seems worth-while at the present juncture to investigate other methods which, while less elegant and superficially more complex may prove more tractable.”

A large group of approximately 100 people, including men and women of various ages, are posed on the wide stone steps of a grand, multi-story brick building. The building features classical architectural elements such as columns, arches, and decorative moldings. The group is arranged in many rows, with some people sitting on the balustrade of the upper steps. The scene is brightly lit, suggesting a sunny day. Two black text boxes are overlaid on the image: one at the top and one at the bottom.

Thankyou all for attending !

See you in Snowmass ☺
