SPIN2006, Oct. 2-7, 2006, Kyoto, Japan

Titles for talks (lead author):

- 1. ILC Polarized Electron Source Overview (Brachmann)
- 2. Transport Mechanisms in Semiconductor Photocathodes (Ioakeimidi)
- 3. Polarization Possibilities of Small Spin-Orbit Interaction in Strained Superlattice Photocathodes (Maruyama)
- 4. An Experiment to Measure Spin Relaxation in Superlattice Structures using Faraday Rotation (Maruyama)
- 5. GaN As a Robust Photocathode for Polarized Electrons (Ioakeimidi)
- 6. Low Emittance Guns for Polarized Electron Beams (Clendenin)

Abstracts are due July 8th.
