

# SiLC meeting

## Friday, 3 February 2006

### R&D on Electronics (09:00 - 14:00)

time	[id] title	presenter
09:00	[15] The design in 130nm CMOS UMC techno of a F.E. and readout electronics chip for Si tracking at ILC	THANH HUNG PHAM
09:20	[16] Technologies offered by Europractice at IMEC and Foundry access through Europractice	PAUL MALISSE
10:00	[17] Radiation effects on 130nm CMOS technologies	FEDERICO FACCIO
10:40	Coffee break	
11:00	[18] Simulation on sensors and related issues on detector design	ZDENEK DOLEZAL
11:30	[19] Time measurement and tagging with Silicon trackers	JACQUES DAVID
12:00	[20] Readout, calibration, DAQ electronics	OPENED DISCUSSION
12:30	Lunch break
