

FCAL software and analysis WG.
Meeting Minutes.
June 08, 2016.

Bogdan gave a talk on update of LumiCal reconstruction.

- LumiCalClusters class was updated;
- Previously hard coded parameters of the geometry were moved to steering file;
- Latest version available with svn co (HEAD), steering file is in examples;
- LuCaS also was updated, GEAR file is generated to use with LumiCalClusterer.
- Fixes and tune-up are still needed for LumiCalClusterer.

During the discussion:

- DD4Hep implementation of LumiCal was discussed. Andre will check with Marco who worked on that and provide the information (link, path) on where it can be found;
- It was decided that Bogdan will be a contact person for FCAL software in ILD;
- It is necessary to check and prepare FCAL software for ILD MC production, check new L* and LHCAL implementation.
