

Draft: Plans of Accelerator Physics Group in Vancouver

Parallel session (July 21 afternoon, + maybe July 20 afternoon?)

Review of Status and plans (40 min x 3)

- RTML: P. Tenenbaum +?[*]
- ML: J. Smith +?[*]
- BDS: G. White +?[*]

Discussion (45 min)

- Conceptual feedback design. [*]
- Standard of errors to be included in simulations. [*]
- What is the realistic and effective way of Integrated simulations? [*]

Review and re-define tasks and a coordinator of each task. (20 min)

- Main linac, do we agree to move static tuning to dynamic studies? (Static tuning studies in RTML and BDS have still high priorities.)

For Communication - Web pages, TV/phone meetings, face to face meeting.
(20 min)

(Length of each topic depends on whether we have July 20 or not.)

[*]: We will need volunteers to review or lead discussions.

Plenary talks

Kiyoshi Kubo: Status and Plans, July 19 or 20.

Jeff Smith: Main linac Low emittance preservation, July 22.
