

ILD meeting

21.9.2016

Agenda

- News
- Optimization
- Report from the technical coordinator
- Report from the physics coordinator
- Report from the Software coordinator

News from ILD

- Summer conference season: ILD (ILC) was reasonably well represented at ICHEP
- Fairly constant level of activities both in analysis (see regular Wednesday meetings) and in hardware.
 - LCTPC testbeam effort this fall (DESY, KEK, others)
 - Calo test beam effort
 - CALICE Meeting in Arlington

Institute Assembly Chair

Jan Timmermans has been the elected chair of the institute assembly since October 17, 2015

His term expires after two years.

Jan decided not to stand for re-election

Many thanks to Jan already now how did a great job to setup and establish the Institute Assembly, and, more generally, was instrumental in defining the ILD by-laws!

Call for nomination of the new chair has gone out to the institute assembly, Please contact your IA representative if you have suggestions or ideas.

ILD Mailing List

We try to update our central ILD mailing list:

- Please send to Jan a list of people with e-mail who you consider members of ILD at your institute.
- This is not an author list, so you can be broad and inclusive, there is no formal requirement
- Even people from institutes who are not members of ILD can be on that mailing list.
- Currently we have received answers from about 50% of all ILD institutes.

Publication/ Speakers Bureau

We are still in the process of finding the chair of the speakers bureau.

However has started to work already now:

- Rehearsal for ICHEP talks
- First paper is in the review stage

Infrastructure to handle papers etc is still under development, slow due to lack of personpower.

Z-running

Paper on Z-running after iteration within ILD after last meeting has been sent to the LCC Parameters groups (chair Jim Brau, ILD member is Jenny List).

Work is ongoing within ILD to provide more solid answers and to develop and understand more fully a calibration strategy within ILD.

Discussion on this is anticipated at LCWS2016 in Morioka

We plan to have a dedicated ILD phone meeting with intermediate results on this probably in 4 weeks.

ILD Web presence

Repeat from last meeting:

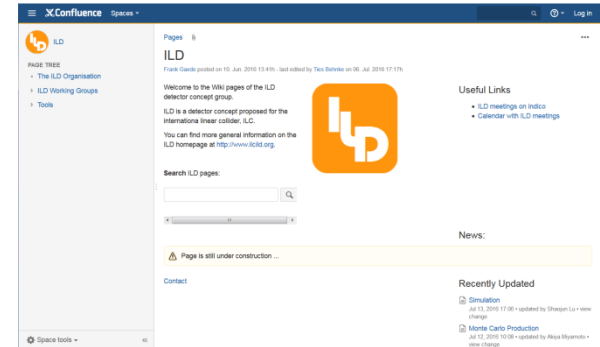

Our old WEB page is very much out-of-date (www.ilcild.org)

We propose to move the page to a new system.

- Hosted at least partially by a confluence like system
- Hosted at DESY
- Can be maintained by everyone

<http://confluence.desy.de/display/ILD/ILD>

- We are looking into a system to host and manage notes etc

System under evaluation
and test, watch for
further news

Logo Competition

We have opened a poll on the logo proposals which we have received.

You are invited to vote under

<https://goo.gl/dw7g9y>

Based on the results the ET will prepare a proposal for the IA, who has the final word.

Optimization

See report by Claude / Keisuke/ Frank on the progress on different issues.

Several task forces have been started, organise meetings.

Meetings

LCWS 2016 Morioka: half day meeting on Wednesday for ILD

- Report on ILD optimization status and tools
- Detailed agenda under development

Institute assembly during meeting is planned.

2017: ILD meeting most likely connected to the spring meeting in Santa Cruz.

- Format analogue to Santander, details will be defined once Santa Cruz details are clarified.
