

# LCC AD&I activities

- No (FUZE) meeting since Santander workshop
    - ▶ Most ADI activity focused on CRWG
  - International AD&I effort will become sub-critical end of 2016
    - ▶ Close-down of US AD&I resources
  - Plan:
    - ▶ Graciously ramp down existing international AD&I effort
    - ▶ Document status (progress)
    - ▶ By end of 2016 (effectively LCWS 16)
-

# Approach

- Arrange AD&I meeting (proposal: 13.10.2016)
  - From conveners:
    - ▶ Request status (as usual)
    - ▶ Provide plans for documentation by LCWS 16
  - Effectively
    - ▶ What can be achieved and documented within this time frame?
    - ▶ Make a plan to produce / update documents.
-

# Scope?

- Cornell DR work (including parameter table update)
- Lattice consolidation
  - ▶ Can we make a new release?
  - ▶ What should (could) be included? (Outstanding CR-11?)
- CFS
  - ▶ What drawings can we update?
- ...

I fear even this effort will be relatively little, but we will do what we can.
