

## Minutes of WP-meeting 269

### Attendance:

DESY: Claus Kleinwort, Oliver Schäfer, Dimitra Tsionou

Vidyo: Ron Settles, Akira Sugiyama, Jan Timmermans

### General News:

Dimitra explained the Interface Control Document. The document and the ECAL example are uploaded to the webpage of today's meeting. LCTPC has to provide its information two weeks before the next LCWS in Strasbourg, meaning around the beginning of October. Working team must be formed (after discussion with Jochen, Paul, Dimitra ...) in order to complete this document.

Ron explained that a draft of the LCTPC MOA Addendum update is ready.

Leif will release the draft after the date of the next LCTPC collaboration meeting is decided.

Discussion followed related to the date of the next collaboration meeting:

- 1) before or after Strasbourg or
- 2) in Japan or Desy

Jochen will send a doodle after he is back from vacation.

### PCMAG/LP setup, test beam:

Dimitra: PCMAG/TRACI/test beam area:

- Safety investigation is on-going.
- The stray magnetic field around the outside of the test-beam area is being measured.

### News from the groups:

Akira: None. Students have vacation

Dimitra: Analysis of test beam data is on going for  $dE/dX$  and two track resolution

- Two track separation is studied from real data taken with 3% rad. length material just before TPC.

Jan: Pixel beam test data analysis is on going by students.

### AOB:

The next workpackage meeting will take place on August 24<sup>th</sup>.
