

# CP-violating top quark couplings at future linear $e^+e^-$ colliders

W. Bernreuther<sup>1</sup>, L. Chen<sup>1</sup>, I. García<sup>a,2</sup>, M. Perelló<sup>2</sup>,  
R. Poeschl<sup>3</sup>, F. Richard<sup>3</sup>, E. Ros<sup>2</sup>, M. Vos<sup>2</sup>

referees report

J. Tian, D. Jeans

First paper to go through yet-to-be-approved ILD publication process

combined theory, ILD, CLICdp paper

for ILD, classified as “topical paper”

- journal papers reporting results of specific studies, analyses, etc., which are based on ILD.
- limited author list: proposal by main authors; “opt-in” procedure

parallel CLICdp review process

timeline:

July '17                  review committee established  
   J. Tian, D. Jeans

3 Aug                      draft received

*summer vacation...*

Aug                      K. Kawagoe's comments  
28,29 Aug              reviewer's comments

- *well-written paper with interesting results*
- *should be published*
- *several requests and suggestions for clarifications, corrections, style*
- *all considered and replied-to by authors, many accepted*

6 Sep	author's reply & draft update
7 Sept	circulated to ILD (2 weeks' comment period)
21 Sept	end of comments period - detailed comments from J. List (thanks) - no requests for author list opt-in
27 Sept	today's meeting

Next steps: replies and updated draft in response  
to ILD member's comments received on or before 21 September

When paper reviewers consider that ILD's comments/questions  
have been reasonably dealt with,  
recommend PSB to publish  
(or recommend second ILD-wide review : very unlikely in this case)
