

Topic	Group	Comment	
ee->tt Full leptonic, Matrix element	LAL/Tohoku	Ongoing analysis	
ee->bb	LAL	PhD thesis and arxiv published, paper follows	← Arxiv: 1709.04289
Top mass, ee->tty	IFIC	Ongoing analysis	← Pheno paper in preparation
Top mass Threshold, interpretation	MPP-MPG	Ongoing analysis	
ee->tt Anomalous couplings using EFT	IFIC	Ongoing analysis	
Top CPV couplings	IFIC/LAL/RWTH	arxiv published	← Arxiv: 1710.06737
ee->tt, continuum Fully hadronic	LAL, UCL,(University of Tokyo)	Resuming of analysis	← Occasional meetings between LAL, UCL
Jet algorithms	IFIC	“Standing” item with several applications	← Kick-off today
QCD e.g. alpha_s	???	Open topic	
t->ch	Warsaw	Ongoing analysis	
t->cy	MPP	Ongoing analysis	

- We will propose to the IA to elect **Ryo Yonamine** of Tohoku as co-convener of the Top/QCD group to replace **Hitoshi Yamamoto**
- Effectively Ryo is the new convener
- Election will be part of the upcoming series of elections to be launched by the IA chair

- Paper on CPV violation (IFIC, LAL, RWTH) published as arxiv:**1710.06737** submitted to EPJC

1 **CP-violating top quark couplings at future linear e^+e^- colliders**

2 **W. Bernreuther¹, L. Chen¹, I. García^{a,2}, M. Perelló²,**
3 **R. Poeschl³, F. Richard³, E. Ros², M. Vos²**

4 ¹Institut für Theoretische Teilchenphysik und Kosmologie, RWTH Aachen University, 52056 Aachen, Germany

5 ²Instituto de Física Corpuscular (IFIC, UVEG/CSIC), Apartado de Correos 22085, E-46071, Valencia, Spain

6 ³Laboratoire de l'Accélérateur Linéaire (LAL), Centre Scientifique d'Orsay, 91898 Orsay Cédex, France

- Note on $ee \rightarrow bb$ (LAL) available on arxiv after review by Keisuke and Mikael
Arxiv:**1709.04289**

Level of II D Public Note may need still II D ID

Measurement of b quark EW couplings at ILC

S. Bilokin, R. Pöschl and F. Richard.

Laboratoire de l'Accélérateur Linéaire (LAL), Centre Scientifique d'Orsay, Université Paris-Sud XI,
BP 34, Bâtiment 200, F-91898 Orsay CEDEX, France

Paper about to be written (put into latex, final x-checks) -> Formal collaboration review
Plan to finish before Xmass

- Analyses mentioned in first place in talks by Jenny, Ties and Filip (thanks)
- Top mass, $ee \rightarrow t\bar{t}\gamma$ presented by Pablo Gomez, rather phenomenological
Issue on photon reconstruction still open
- top Elw. couplings and EFT presented by Martin Perello
- Update on top elw. couplings with ME method by Yo Sato
- A word of warning on systematic effects by Bremsstrahlung and ISR by F. LeDiberder
- $ee \rightarrow b\bar{b}$ formed experimental “backbone” of talk(s) by Francois Richard on RS models
- F. Simon presented update on top mass at threshold
- F. Zarnecki presented update on t-ch

We are pretty bad on that!!!!

- tentative top/QCD DQ checkers

R. Yonamine (LCFIplus)

S. Amjad (top reconstruction)

P. Gomis (photon reconstruction)

Others?
