MEXT Review

ILC Advisory Panel

Set up in May 2014 under MEXT ILC Task Force to investigate various issues concerning the possibility of hosting the ILC in Japan

New round will start from January 2018.

It is not yet clear what kind of questions will be asked by the MEXT physics WG, but judging from what was asked yesterday, at least the following is expected:

- What has changed since the 2015 interim summary.***
- What would be lost by lowering the energy to 250 GeV?***
- Range of validity of EFT and what would we do if EFT is not valid?***
